Line based Placement:

We now move on from creating a grid to placing things on the grid. Our grid always has lines — these are numbered beginning with 1 at the top of the document. For example, column line 1 in English (written left-to-right) would be on the left-hand side of the grid and row line 1 at the top.

- `grid-column-start`
- `grid-column-end`
- `grid-row-start`
- `grid-row-end`
- Shorthand properties: `grid-row`, `grid-column`, `grid area`
